SUMMARY

Full-stack developer working with React, Next.js, TypeScript, Python, and FastAPI. Co-author of a published deep learning research paper on ECG-based cardiovascular disease detection (IJNRD). Daily Linux (Parrot OS) user, moving deeper into Docker, CI/CD, and cloud. Open to full-time, internship, and freelance opportunities - remote or on-site.

PROJECTS

Production-Grade Full-Stack Portfolio

Seven-theme portfolio with terminal mode, AI assistant (multi-provider fallback), CMS, analytics, blog engine, and FAQ system. Next.js, TypeScript, Tailwind, Supabase - Lighthouse 95+.

Dynamic Kalamkari E-Commerce Platform

Marketplace for hand-painted textiles: JWT auth, customer & admin dashboards, product management, dynamic pricing, and a content-based recommendation system. Next.js, FastAPI, PostgreSQL.

ECG-Based Cardiovascular Disease Detection

Deep learning pipeline classifying cardiovascular conditions from ECG signals; noise-robust preprocessing and imbalance-aware evaluation. Python, TensorFlow. Published research (IJNRD 2025).

RESEARCH

Innovative Deep Learning Approaches for ECG-Based Cardiovascular Disease Detection

International Journal of Novel Research and Development (IJNRD), 2025.

SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS
